SESSION CONTEXT

You are introducing a new company policy requiring all remote workers to be logged in between 10 AM and 3 PM. Mike works best late at night and will argue that this arbitrary rule will hurt his productivity.

SESSION OVERVIEW

ASSISTANT

Look, I get why you want everyone logged in from 10 AM to 3 PM, but this new policy is a nightmare for me. I do my best work late at night when I'm actually focused and not distracted by daytime chaos. Forcing me to be online during those hours is just going to kill my productivity. What's the point of being remote if you're just going to micromanage my schedule like I'm in some cubicle?
